

Summary Report

Ridgefield Library Phase I Environmental Site Assessment Ridgefield, Washington

Prepared for
Fort Vancouver Regional Library District

Prepared by
BergerABAM

17 April 2018

17 April 2018

Ms. Amelia Shelley, Executive Director
Fort Vancouver Regional Library District
1007 East Mill Plain Boulevard
Vancouver, WA 98663-3504

Dear Amelia:

BergerABAM is pleased to submit our "FINAL Phase I Environmental Site Assessment" for the property located at 210 North Main Street, Ridgefield, Washington. Our services were completed in general accordance with our proposal dated 21 February 2018.

We appreciate the opportunity to assist the Fort Vancouver Regional Library District on this project. Please contact us if you have questions regarding this report.

Sincerely,

Amber J. Roesler
Senior Environmental Scientist

Summary Report

Ridgefield Library Phase I Environmental Site Assessment Ridgefield, Washington

Submitted to

**Fort Vancouver Regional Library District
1007 East Mill Plain Boulevard
Vancouver, Washington 98663**

DECLARATIONS

- "I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Sec. 312.10 of 40 CFR Part 312."
- "I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I performed and/or developed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."¹

Submitted by

**Amber J. Roesler
Senior Environmental Scientist**

**Sally L. Fisher
Senior Project Manager/Environmental Scientist**

**BergerABAM
210 East 13th Street, Suite 300
Vancouver, Washington 98660**

**17 April 2018
A18.0133.01**

¹ A person who does not qualify as an Environmental Professional may assist in the conduct of all appropriate inquiries in accordance with ASTM E 1527-13, if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional when conducting such activities.

**RIDGEFIELD LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT
RIDGEFIELD, WASHINGTON**

1.0 INTRODUCTION

This report summarizes the results of our Phase I Environmental Site Assessment (ESA) of Clark County Tax Parcel 71045034 located at 210 North Main Avenue in Ridgefield, Washington. The tax parcel is approximately 0.26 acre and is herein referred to as the “site” or “subject site.” The subject site is being offered for donation to the Fort Vancouver Regional Library (FVRL) by the current property owner, the Ridgefield Community Center Association. The site vicinity is depicted on Figure 1. An aerial view of the subject site and the surrounding properties are shown in Figure 2.

The site is currently developed with an 8,000-square-foot building and associated asphalt paved parking lot. The building is used as a community center and a library. The results of this Phase I ESA will be used as part of the FVRL’s evaluation of potential recognized environmental conditions (RECs) associated with site ownership.²

1.1 Purpose and Scope of Services – Phase I ESA

The purpose of this Phase I ESA is to identify potential RECs in connection with the subject site. BergerABAM services were completed in general accordance with our proposal, dated 21 February 2018, and authorized by the FVRL on 23 February 2018. The scope of services was developed in general accordance with American Society for Testing and Materials (ASTM) Standard E 1527-13 for Phase I ESAs and Environmental Protection Agency (EPA) Federal Standard 40 Code of Federal Regulations (CFR) Part 312 “Standards and Practices for All Appropriate Inquiries (AAI).” The scope of services described below was completed by an environmental professional as described in Federal Standard 40 CFR. Our scope of services for the Phase I ESA included the following.

1. Reviewing readily available environmental reports, and/or other relevant documents pertaining to environmental conditions at the subject site.
2. Reviewing the results of a federal, state, local, and tribal environmental database search provided by Environmental Data Resources (EDR) for listings of sites with known or suspected environmental conditions on or near the subject site within the search distances specified by ASTM.
3. Reviewing Washington State Department of Ecology (Ecology) files regarding listed sites of potential environmental concern relative to the subject site.

² Recognized Environmental Conditions are defined in ASTM E1527-13 as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.”

4. Conducting a visual reconnaissance of the subject site and adjacent properties to identify visible evidence of RECs.
5. Interviewing representatives of the subject site regarding past and present site uses and the use, storage, treatment, handling, or disposal of hazardous substances at the subject site now or in the past.
6. Reviewing historical aerial photographs, historical topographic maps, and land use and tax assessor records to identify past development history on and adjacent to the subject site relative to the possible use, generation, storage, release, or disposal of hazardous substances.
7. Identifying uses/development of the subject site from 1912 to the present.
8. Reviewing current U.S. Geological Survey (USGS) topographic maps to identify the physiographic setting of the subject site and provide a statement on the local geologic, soil, and groundwater conditions based on our general experience and sources, such as geologic maps and soil surveys.
9. Identifying the source of potable water for the subject site and current heating and sewage disposal systems.
10. Providing a written summary of the Phase I ESA results and identified RECs along with our opinion and recommendations regarding the potential for contamination by hazardous substances at the subject site.

1.2 Special Considerations

The EPA standard for AAI requires that the end user of this report disclose whether there is a significant difference between the purchase price of the subject property and the fair market value. This comparison is intended to assess whether the property value is reduced as a result of real or perceived contamination. Amelia Shelley with the FVRL provided this information by completing our Phase I ESA User Questionnaire (Appendix A).

BergerABAM services did not include a hazardous materials survey for lead-based paint, asbestos-containing materials, mold, or radon. Soil, surface water, or groundwater sampling and chemical analysis were not included as part of this scope of services.

2.0 SUBJECT SITE DESCRIPTION

2.1 Involved Parties

Information obtained from the Clark County Geographical Information Systems indicates the subject site is currently owned by the Ridgefield Community Center Association. We understand that FVRL is considering accepting the site as a donation and is planning to expand the building for the library.

2.2 Location, Legal Description, and Setting

General site information, property use(s), and environmental setting of the subject site area are summarized in Table 1. Refer to Figures 1 and 2 for a vicinity map and a site map. Photographs of the subject site are included in Appendix B.

Table 1. Subject Site Information

Topographic Map	USGS, 7.5 minute topographic map, Ridgefield, 2014
Quarter/Quarter, Section, Township, and Range	NE 1/4, S24, T4N, R1W
Subject Site Address	210 North Main Avenue, Ridgefield, WA
Subject Site General Location	On the southeast corner of North Main Avenue and Mill Street
Tax Parcel Number	71045034
Abbreviated Tax Parcel Legal Description	DAVIS ADDN TO RIDGEFIELD LOTS 3 & 4 BLK 4vvv
Subject Site Approximate Area	0.26 acre
Subject Site Existing Use	The site is occupied by the City of Ridgefield Community Center and Library
Geologic Setting	Willamette Lowland – Portland Basin
Nearest Surface Water Bodies	Lake River is located about 1,000 feet west of the subject site
Approximate Surface Elevation	87 feet above mean sea level
Soil and Geologic Conditions	Fine sands and silty sand to about 15 feet underlain by clay and the Upper Troutdale Formation according to data compiled by Maul Foster and Alongi (MFA)
Depth to Groundwater	Groundwater is present at approximately 2 to 7 feet below ground surface, according to groundwater monitoring data (MFA August 2015)
Inferred Direction of Shallow Groundwater Flow	To the northwest (MFA August 2015)

BergerABAM's knowledge of the general physiographic setting and geology and groundwater occurrence in the subject site vicinity is based on our review of the topographic map listed above and subject site reports obtained from Ecology.

2.3 Subject Site Reconnaissance

2.3.1 Summary of Observations

A representative of BergerABAM performed a visual reconnaissance of the subject site on 14 March 2018 with Sean McGill, Ridgefield Community librarian; Dave Josephson, FVRL's facilities manager; and Jerry Stallings from the Ridgefield Community Center Association board.

Table 2 below summarizes conditions observed during our subject site reconnaissance.

Table 2. Summary of Subject Site Reconnaissance Observations

Feature	Observed		Comment, Location, and/or Description
	Yes	No	
Structures (existing)	X		
Structures (evidence of former)		X	
Heating/Cooling System	X		Natural gas and electrical heating/cooling
Floor Drains, Sumps, or Drywells	X		Two floor drains were observed in the kitchen. According to Dave Josephson, FVRL's facilities manager, the drains are connected to the municipal sanitary system.
Aboveground Storage Tanks (ASTs)		X	
Underground Storage Tanks (USTs) or Evidence of USTs		X	
Drums or Other Containers		X	
Chemicals or Hazardous Materials (other than de minimis quantities of cleaning products)		X	
Evidence of Leaks, Spills, or Releases Surrounding ASTs, USTs, and/or Chemical Storage Areas		X	
Stained or Corroded Floors, Walls, or Drains (other than apparent water stains or minor oil stains on pavement from parked vehicles)		X	
Pipes of Unknown Origin or Use		X	
On-site Septic System		X	
Sewage Disposal System	X		Sewage is disposed through the municipal sanitary system.
Potable Water Supply		X	
Solid Waste Refuse Dumpsters	X		
Hydraulic Hoists		X	
Oil/Water Separators		X	
Discolored or Stained Soil or Vegetation Potentially from Hazardous Substances		X	
Hazardous Waste Disposal Areas		X	
Uncontained Debris, Refuse, or Unidentified Waste Materials		X	
Standing Water or Other Liquids		X	

Feature	Observed		Comment, Location, and/or Description
	Yes	No	
Catch Basins and Stormwater Drainage		X	
Pits/Ponds/Lagoons		X	
Waste or Wastewater Discharges		X	
Unusual Odors		X	
Stressed Vegetation		X	
Fill Material		X	
Water Wells (agricultural, domestic, monitoring)		X	
Pad-Mounted Transformers		X	
Pole-Mounted Transformers		X	
Other Conditions of Environmental Concern		X	

2.4 Adjacent Property and Vicinity Observations

BergerABAM observed properties located adjacent to and surrounding the subject sites on 14 March 2018. We observed the adjacent properties from accessible public rights-of-way and the subject site. Table 3 below outlines adjacent land uses and pertinent observations with respect to conditions that could pose a REC on the subject sites.

Table 3. Adjacent Land Uses

Direction	Adjacent Property and Use(s)
North	Mill Street and Davis Park
West	North Main Avenue and a vacant lot
South	Immediately adjacent - Vinnies Pizza and a nail salon
East	Immediately adjacent - private residences

3.0 ENVIRONMENTAL RECORDS REVIEW

3.1 Database Search

BergerABAM reviewed the results of a search of pertinent environmental regulatory lists and databases for current or previous facilities listed at the subject sites and addresses located within ASTM-specified distances from the subject sites. The information reviewed was provided by a subcontracted regulatory list search service, EDR. The EDR report is presented in Appendix C. The report includes details regarding the listed facilities identified and maps showing the approximate locations of the listed facilities relative to the subject site.

The subject site is not listed in the EDR report. Off-site facilities that are located within 1 mile of the subject site are listed in various databases (e.g., Confirmed and Suspected Contaminated Sites [CSCS], ALLSITES³, and underground storage tank [UST]) in the EDR report. Table 4 summarizes the listed facilities that, in our opinion, could pose a REC to the subject site and warranted additional research. Sites identified in the EDR report that are not listed in Table 4 are (1) located in a crossgradient or downgradient position from the subject site; (2) located at a distance that likely will not affect the subject site; or (3) identified as a construction stormwater permit.

Table 4. Summary of Regulatory Database Search Listings of Potential Environmental Concern

Figure 2 Map ID	Listed Address and Hydraulic Position Relative to the Subject Site^a	Site Name	Regulatory Database(s)	Description	Site Status
1	204-206 North Main Avenue – upgradient and crossgradient adjacent to the south	Schaffer Property	Hazardous Site List (HSL), CSCS, ALLSITES, Facility Index System (FINDS)	The Schaffer property is currently occupied by a restaurant and paved parking lot. The site was entered into Ecology’s CSCS database in 2004 after site investigations completed by MFA and GeoEngineers reported that site groundwater had detected concentrations of perchloroethylene (PCE) and trichloroethylene (TCE).	The Schaffer property is listed as “awaiting cleanup” on Ecology’s toxic cleanup database. The Schaffer property is considered a REC because (1) groundwater samples collected from the site have had detections of PCE at concentrations greater than Model Toxics Control Act (MTCA) Method A cleanup levels (CULs), and (2) the property is located immediately adjacent to the subject site.

³ ALLSITES are listed in the EDR report as ‘sites of interest’ to Ecology.

Figure 2 Map ID	Listed Address and Hydraulic Position Relative to the Subject Site ^a	Site Name	Regulatory Database(s)	Description	Site Status
2	126 North Main Avenue – upgradient and crossgradient approximately 280 feet south	Hinrich's Property	HSL, CSCS, ALLSITES, FINDS	The Hinrich's property is an undeveloped lot that was entered into Ecology's CSCS database in 2006 after a site investigation completed by MFA reported that site groundwater had detected concentrations of TCE that exceed MTCA Method A CULs.	According to Ecology's online records, the Hinrich's property is listed as "awaiting cleanup." The property is considered a REC because (1) in 2006 groundwater samples collected from the site had detections of TCE at concentrations greater than MTCA Method A CULs, and (2) it is located about 280 feet upgradient/ crossgradient to the subject site.
3	122 North Main Avenue - upgradient/ crossgradient approximately 300 feet south	Park Laundry	HSL, CSCS, Resource Conservation and Recovery Act (RCRA) Large Quantity Generator, EDR Historical Drycleaner	The Park Laundry property is an undeveloped lot that was historically occupied by a dry-cleaning business. Ecology records indicate there is documented soil contamination on the former Park Laundry property, as well as extensive groundwater contamination.	According to Ecology files, the site status is "cleanup started" and the property owner is evaluating remedial options. The Park Laundry property is a REC because volatile organic compounds (VOCs)/solvents released at the site from the former dry-cleaning business have migrated onto the subject site. According to the reports summarized in Section 3.2, soil, indoor air, and groundwater at the subject site is impacted by VOCs; specifically, PCE and its breakdown products (TCE and 1,2-dichloroethane).
4	227 Pioneer Avenue upgradient/ crossgradient approximately 580 feet south	McKinney, Paul R.	EDR Historical Auto (potential gas or service station)	The McKinney property is listed on EDR's historical auto database. No releases have been reported at this facility.	There is no record on file with Ecology for the McKinney property. The property is not considered a REC because of its relative distance to the subject site and it is not the source of any known contamination or release of contaminants

Figure 2 Map ID	Listed Address and Hydraulic Position Relative to the Subject Site^a	Site Name	Regulatory Database(s)	Description	Site Status
5	Pioneer Street and Third - upgradient approximately 580 feet south	Wertz and Weeks Property	HSL, CSCS, ALLSITES	The Weeks property is currently an undeveloped lot that adjoins the location of a former Shell service station owned by Darren Wertz. The MFA 2016 "Downtown Brownfields Planning and Revitalization Project Report" indicates that petroleum hydrocarbon (gasoline) contamination from the Wertz property has migrated onto the Weeks property to the west. Concentrations of petroleum constituents exceeded MTCA CULs in soil and in groundwater.	The Wertz and Weeks property is listed as "awaiting cleanup" on Ecology's toxic cleanup database. The Wertz and Weeks property is not considered a REC based on the subject property's relative distance from the location of the petroleum release and the magnitude of the contamination
6	304 Pioneer Street - upgradient approximately 550 feet southeast	Ridgefield School District (Bus Barn)	CSCS, UST, Independent Cleanup Reports , ALLSITES	The 2016 "Downtown Brownfields Planning and Revitalization Project" report by MFA indicates that gasoline in soil exceeded Ecology's MTCA CULs on the south and north sides of the bus barn building, primarily near the location of former USTs.	The Ridgefield School District property is listed as 'awaiting cleanup' on Ecology's toxic cleanup database. It is not considered a REC because according to the 2016 MFA report the contamination at the property is confined to the property or public rights-of-way.
7	327 Pioneer Street - upgradient approximately 730 feet southeast	D&L Logging	Independent Cleanup Report (ICR), UST, CSCS, no further action (NFA)	The D&L logging site is listed for a petroleum hydrocarbon leaking UST. The property was reportedly cleaned up in 1993.	The D&L logging property is listed as "no further action" on Ecology's toxic cleanup database. It is not a REC because, according to Ecology records, soil and groundwater contamination at the site has been cleaned up.
8	Shown mapped at 790 feet upgradient (no address listed)	Columbia Lewis Rivers	ALLSITES, RCRA non-generator	According to the EDR report this facility was listed in Ecology's files as a hazardous waste non-generator with no violations.	The Columbia Lewis Rivers facility does not have any documented spills on Ecology's searchable databases. Therefore, this facility is not considered a REC to the subject site.

Figure 2 Map ID	Listed Address and Hydraulic Position Relative to the Subject Site ^a	Site Name	Regulatory Database(s)	Description	Site Status
9	111 West Division Street - downgradient approximately 1,400 feet northwest (Note: Even though this site is hydraulically downgradient, the online Ecology file was reviewed because of an air pollution listing)	Pacific Wood Treating Corp.	HSL, CSCS, ALLSITES, Spills, Aerometric Information Retrieval System	Pacific Wood Treating operated at the Port of Ridgefield from 1964 to 1993. The Port has recently completed remediation of the 40-acre former wood-treating facility on its property on Lake River; however, off-property soil contamination (dioxins) is currently being delineated (Ecology 2017).	The Pacific Wood Treating property is listed as "cleanup started" on Ecology's toxic cleanup database. According to the Ecology 2017 Fact Sheet (included as Appendix D), soil at the subject site will be sampled as part of the "Phase II" off-property assessment." The Pacific Wood Treating site is a REC because dioxins may have been transported by air onto the subject site prior to development.

^a Notes: Shallow groundwater flow direction in the subject sites vicinity flows to the northwest as noted in Section 2.2.

3.2 Review of Regulatory Files

BergerABAM reviewed regulatory files for the Park Laundry site. A summary of the environmental documents for the subject site are summarized below and provided in Appendix E.

3.2.1 Data Submittal Letter to Ecology by Maul Foster Alongi dated 29 August 2011

The 2011 letter to Ecology summarizes remedial investigation (RI) data collected by MFA at the site and surrounding properties (including the subject site). MFA completed the installation of 7 monitoring wells, 62 temporary wells, and 15 soil gas probes. The results of the remedial investigation indicate that VOCs (PCE and TCE) are present on the Park Laundry property and on the neighboring properties. A brief summary of the data collected with respect to the subject site is provided below.

- The groundwater VOC plume extends from the Park Laundry site to the northwest (beneath the subject site) as shown on Figures 3 and 4.
- A subslab soil gas sample (SG13) collected on the subject site had one VOC detection: PCE at a concentration of 150 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$).
- A groundwater sample collected on the subject site (GP67-W-17) at a depth of 17 feet below the ground surface had detections of PCE and TCE at concentrations of 175 micrograms per liter ($\mu\text{g}/\text{l}$) and 6.41 $\mu\text{g}/\text{l}$, respectively. The MTCA Method A soil CUL for PCE and TCE is 5 $\mu\text{g}/\text{l}$.

3.2.2 Vapor Intrusion Exposure Assessment Report by MFA dated September 2013

MFA completed vapor intrusion (air) sampling at the subject site and vicinity in 2012 and 2013. A brief summary of the results for the subject site is provided below. The air samples were submitted for analysis of VOCs associated with the breakdown of PCE (1,1-dichloroethane, 1,2-dichloroethane, chloroethane, cis-1,2-dichloroethene, PCE, trans-1,2-dichloroethene, TCE, and vinyl chloride).

Indoor air

MFA collected indoor air samples (5IA1-111412, 5-IA2-111412, 5IA3-111412, 5-IA1-073013, 5AI2-073013, and 5AI3-073013) at the subject site in November 2012 and July 2013. PCE, TCE, and 1,2-dichloroethane were the only VOCs detected in indoor air at the subject site. The detected concentrations of VOCs were as follows.

- PCE was detected in five samples at concentrations ranging from 0.22 $\mu\text{g}/\text{m}^3$ to 0.81 $\mu\text{g}/\text{m}^3$. None of the six air samples had detected concentrations exceeding the MTCA Method B (carcinogenic) screening level for PCE (9.6 $\mu\text{g}/\text{m}^3$).
- TCE was detected in four indoor air samples at concentrations ranging from 0.063 $\mu\text{g}/\text{m}^3$ to 0.68 $\mu\text{g}/\text{m}^3$. One of the six air samples had detected concentrations that exceed the MTCA Method B (carcinogenic) indoor air screening level for TCE (0.37 $\mu\text{g}/\text{m}^3$).
- 1,2-dichloroethane was detected in six samples at concentrations ranging from 0.064 $\mu\text{g}/\text{m}^3$ to 0.15 $\mu\text{g}/\text{m}^3$. Two of the six air samples had detected concentrations that exceed the MTCA Method B (carcinogenic) indoor air screening level for 1,2-dichloroethane (0.096 $\mu\text{g}/\text{m}^3$).

Subslab Air

MFA collected two subslab air samples (5-SS1-073013 and 5-SS2-073013) at the subject site July 2013. PCE was the only VOC detected in the subslab samples. The PCE concentrations were 750 $\mu\text{g}/\text{m}^3$ in Sample 5-SS1-073013 and 320 $\mu\text{g}/\text{m}^3$ in Sample 5-SS2-073013. Both samples exceed the MTCA Method B (carcinogenic) screening level for PCE in subslab air of 96 $\mu\text{g}/\text{m}^3$.

Soil Vapor

MFA collected two soil vapor air samples (5-SG-111512 and 5-SG2-073013) at the subject site. PCE, TCE, and 1,2-dichloroethane were the only VOCs detected in the soil vapor samples. The detected concentrations of VOCs were as follows.

- PCE was detected in the two soil vapor samples at concentrations of 92 $\mu\text{g}/\text{m}^3$ (5-SG-111512) and 250 $\mu\text{g}/\text{m}^3$ (5-SG2-073013). The detected concentration of PCE in sample 5-SG2-073013 exceeds the MTCA Method B (carcinogenic) soil vapor screening level of 96 $\mu\text{g}/\text{m}^3$.
- TCE was detected in one soil vapor sample at a concentration ranging of 0.48 $\mu\text{g}/\text{m}^3$. The MTCA Method B (carcinogenic) soil vapor screening level for TCE is 3.7 $\mu\text{g}/\text{m}^3$.

- 1,2-dichloroethane was detected in one soil vapor sample (5-SG-111512) at a concentration of 0.16 µg/m³. The MTCA Method B (carcinogenic) soil vapor screening level for 1,2-dichloroethane is 0.96 µg/m³.

3.2.3 Letter from the Washington State Department of Health, March 2013

In the Washington State Department of Health (DOH) letter “Health Consultation, Park Laundry Site, Indoor Air Results for November 2012,” March 2013, the DOH used the data from MFA’s November 2012 sampling event to determine whether the chemicals found in indoor air posed a health threat to building occupants. The DOH concluded that breathing the maximum concentrations of VOCs found in indoor air in commercial buildings within the study area (including the subject site) are not expected to cause harmful health effects.

4.0 SUBJECT SITE HISTORY

4.1 Historical Resources

Our understanding of the history of the subject sites is based on a review of the information from the historical resources listed in Table 5 and interviews with the individuals listed.

Table 5. Historical Resources Reviewed

Description	Provider or Interviewee	Dates of Coverage or Dates of Site Knowledge	Date Reviewed or Contacted	Comment
Historical Aerial Photographs ^a (provided in Appendix F)	EDR	1938, 1951, 1960, 1970, 1975, 1981, 1990, 2006, 2009, 2011, 2015	2 March 2018	The subject site has been developed with a structure from at least 1960; see Section 4.2.1 for findings.
Historical Topographic Maps (provided in Appendix F)	EDR	1939/1943, 1954, 1970, 1975, 1995, 2014	2 March 2018	See Section 4.2.2 for findings.
Historical Fire Insurance Maps (provided in Appendix F)	EDR	1912, 1920, 1930	2 March 2018	The 1912, 1920, and 1930 fire insurance maps show no development of the subject site.
Historical City Directories (provided in Appendix F)	EDR	1965, 1970, 1974, 1979, 1984, 1989, 1995, 2000, 2005, 2010, 2014	2 March 2018	See Section 4.2.4 for findings.
Title/Deed of Trust Reports	Chain of title/deed documents were not provided by the current property owner at the time of report publication.			
Building Records	Clark County Property Information Center	2005	2 March 2018	The Clark County online building records show a photo of the current building and a sketch illustrating the square footage of the building dated 7/20/2005.

Description	Provider or Interviewee	Dates of Coverage or Dates of Site Knowledge	Date Reviewed or Contacted	Comment
Interview	Jerry Stallings- Ridgefield Community Association Board Member	2010 to current	14 March 2018	Mr. Stallings did not have any recollection of any use of hazardous materials at the subject site or USTs.
Interview	Sean McGill - Ridgefield Community Library	2000 to current	14 March 2018	Mr. McGill indicated that he keeps a file containing the cleanup/site reports for the Park Laundry site. He provided the files he has via email.
Interview	Dave Josephson – FVRL’s Facilities Manager	1995 to current	14 March 2018	See Section 4.2.4.
Interview	Craig Rankin – Ecology Project Manager for Park Laundry	2017 to current	16 March 2018	See Section 4.2.5.

^a Note: The scale of the photographs reviewed allowed for an interpretation of general site development/configuration, such as identifying most structures, roadways, and clearings. However, the scale of the photographs did not allow for identification of specific site features, such as fuel pumps, wells, or chemical storage areas of the site, if any.

4.2 Historical Subject Site Ownership and Use Summary

4.2.1 Historical Aerial Photographs

The historical conditions shown in the aerial photographs indicate that in 1938 and 1951 the subject site was undeveloped and possibly used for agriculture. The remaining aerial photos (1960, 1970, 1975, 1981, 1990, 1994, 2006, 2011, and 2015) indicate the site was developed with a structure.

4.2.2 Historical Topographic Maps

The historical conditions shown in the topographic maps are summarized below.

- The 1939/1943 and 1954 topographic maps show the site is not developed.
- The 1970 and 1975 topographic maps show a structure on the subject site.
- The 1995 and 2015 topographic maps do not provide any information with respect to development at the subject site.

4.2.3 Historical City Directory

The current address of the subject site (210 North Main Avenue) is listed as the following business names.

- “Daves Building Matris” in 1979
- “Solid as Oak” and “Steve’s Home Center” in 1984
- “Ridgefield Community Center” in years 1995, 2000, 2005, and 2010

4.2.4 Interview with Dave Josephson, FVRL's Facilities Manager

Mr. Josephson indicated that the Community Center was built on the subject property in 1993. He stated that the original structure built on the site was used as a building supply store and that it was torn down to build the Community Center. Mr. Josephson said that he has no knowledge of there ever being any USTs at the site. He also stated that he was not aware of any environmental liens on the chain of title records and that he will provide the records if he can locate them.

4.2.5 Interview with Craig Rankin, Ecology Site Manager for Park Laundry

Mr. Rankin, the Ecology project manager for the Park Laundry site, stated that the soil gas study was "wrapped up" and that no additional soil gas investigation was required because there was "no complete pathway" for soil gas exposure. He also indicated that the remedial feasibility study is in review with Ecology and that it should be going out for public comment in about three months.

4.3 Adjacent Properties

Historical aerial photographs dated 1938 to 2015 were reviewed. The photographs show the following historical conditions on the immediately adjacent properties.

- The 1938 aerial photograph shows the adjacent properties to the north, south, and east are undeveloped while the adjacent property to the west is developed with a residence.
- The 1951 aerial photograph shows that development has occurred on the properties to the north, south, east, and west of the subject site.
- The 1960, 1970, 1975, 1981, 1990, 1994, 2006, 2009, and 2015 aerial photographs show that the property to the north has been cleared (no structures), and the properties to the east, west, and south are all developed with buildings.

4.4 Environmental Liens or Property Use Restrictions

Our research indicates that environmental covenants or deed restrictions have not been filed against the subject site, based on our review of Ecology's database and Clark County's assessor data.

5.0 CONCLUSIONS AND RECOMMENDATIONS

5.1 Conclusions

BergerABAM has performed a Phase I ESA of Clark County Tax Parcel 71045034 located at 210 North Main Avenue in Ridgefield, Washington. The Phase I ESA was conducted in general accordance with the scope and limitations of ASTM E 1527-13 and EPA Federal Standard 40 CFR Part 312. This assessment, as qualified above, has revealed evidence of RECs in connection with the property.

Park Laundry

According to Ecology records, historical dry-cleaning operations has resulted in soil contamination on the former Park Laundry property, as well as extensive groundwater

contamination. Soil gas data and groundwater data indicate the subject site is impacted by the solvent plume. Currently the site is undergoing an evaluation for cleanup options. The former dry cleaner is considered to be a REC.

Pacific Wood Treating

According to Ecology records, airborne contamination from the Pacific Wood Treating site has resulted in dioxins in soil on neighboring properties. Ecology records indicate that soil at the subject site will be sampled as part of the "Phase II off-property assessment." The Pacific Wood Treating site is considered a REC.

5.2 Recommendations

The existing site data indicate that there is some risk associated with ownership of this property due to existing groundwater contamination that has migrated onto the site from the Park Laundry site.

The property transfer agreement should be developed to exclude FVRL from future liability associated with the groundwater contamination that has migrated to the site. Construction issues and costs associated with managing and handling contaminated groundwater should also be considered in the transfer agreement. We recommend discussion with Ecology and an environmental attorney regarding site conditions and related potential liability to FVRL before the property is accepted.

If disturbance of possible asbestos-containing materials is planned at some future date through either demolition or renovation activities, various regulations regarding the handling of asbestos must be followed. Asbestos removal must be performed by properly trained and certified workers. The Southwest Clean Air Agency regulations state that asbestos-containing materials must be removed from a building prior to demolition or their disturbance by renovation activities. If either of these activities are planned for the on-site buildings, we recommend that representative samples of building construction materials be collected and analyzed to confirm the presence and location of asbestos-containing material.

The possible presence of lead-based paint should be disclosed to contractors or personnel working on site and appropriate precautions taken to protect worker health and safety. Demolition debris during the building expansion will likely need to be tested for lead using the Toxicity Characteristic Procedure.

5.3 Data Gap Analysis

A data gap is defined by the ASTM standard (ASTM 1527-13) as "a lack of or inability to obtain information required by the standards and practices listed in the regulation despite good faith efforts by the environmental professional to gather such information." Accordingly, the environmental professional is to identify data gaps, document steps taken to fill them, and comment on their significance. If a data gap has been identified, our professional opinions are provided to describe why the data gap is

or is not significant. In addition to our opinions, data sources consulted and used to assist with our opinion are also identified.

There is a data gap in that a chain of title report was not reviewed for environmental liens because it has not been provided by FVRL. This data gap should be closed prior to acceptance of the property.

6.0 LIMITATIONS

This Phase I ESA has been prepared for use by the FVRL (client) and is not intended for use by third parties with whom BergerABAM has no contractual relationship. BergerABAM has performed this Phase I ESA of Clark County Tax Parcel 71045034 located at 210 North Main Avenue in Ridgefield, Washington, in general accordance with the scope and limitations of our proposal dated 21 February 2018 and ASTM E 1527-13, Standard Practice for Phase I ESAs.

Environmental conditions described in this summary are based on site observations and historical research pertaining to the subject site. Site conditions can change over time. This report represents a summary of site conditions at the time of the site visit, interview(s), and environmental file review.

Within the limitations of scope, schedule, and budget, this report has been prepared in accordance with generally accepted engineering and environmental practices in effect at the time the work was performed.

**Appendix A
Phase I ESA User Questionnaire**

ASTM E1527-13 USER QUESTIONNAIRE

File No.: _____

Project Name: Ridgefield Library Phase I ESA

Site Address/City: 210 N Main Ave, Ridgefield, Washington

User Name Completing Questionnaire: Amelia ShelleyPhone #: 360-906-5012User's Relationship to Property: lesseeDate Completed: 03/05/2018

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

1. Environmental liens that are filed or recorded against the property.

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

Note 1 – In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and activity and use limitations (AULs) be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

No

2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property.

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law?

No

3. Specialized knowledge or experience of the person seeking to qualify for the LLP.

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or

former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Aware of dry cleaner building (demolished) one block south of this location.

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated.

Does the purchase price being paid for this property reasonable reflect the fair market value of the property? If you conclude there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Property would be a donation (no cost), appraised for value for grants and other purposes.

5. Commonly known or reasonably ascertainable information about the property.

Are you aware of common known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

- Do you know the past uses of the property? *Not prior to library occupancy.*
- Do you know specific chemicals that are present or once were present at the property? *No*
- Do you know of spills or other chemical releases that have taken place at the property? *No - see dry cleaner note above, Dioxin*
- Do you know of any environmental cleanups that have taken place at the property?

Not sure. but assume none.

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>PACIFIC WOOD TREATIN</i>	<i>111 WEST DIVISION</i>	<i>WNW 1/4 - 1/2 (0.270 mi.)</i>	<i>F33</i>	<i>129</i>

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/11/2017 has revealed that there

EXECUTIVE SUMMARY

is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 09/13/2017 has revealed that there are 5 HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 01/17/2018 has revealed that there are 6 CSCSL sites within approximately 1 mile of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 01/17/2018 has revealed that there are 3 CSCSL NFA sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Data Year: 2013
Comments: Waste quantities were taken from the Clean Harbors Waste Tracking Detail Reports rather than the manifests. The expected specific gravity of some of the wastes and the reported gallons did not correlate well with the actual quantities received at the TSDR (as reported on the tracking reports).

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact email: Not reported
EPA Region: 10
Land type: Municipal
Classification: Large Quantity Generator
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: K001
. Waste name: BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATERS FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

Inspection Number: 19890313OR033 1
Region: 10
Inspection Date: Not reported
Inspector: SMITH
Violation occurred: Yes
Investigation Type: Specific Product Review
Investigation Reason: For Cause, Regulated Community Complaint
Legislation Code: FIFRA
Facility Function: Producer

FINDS:

Registry ID: 110042040252

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

SUPERFUND (NON-NPL)

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 05/21/2018
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/16/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 01/05/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346
Date Made Active in Reports: 01/12/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 04/30/2018
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (206) 553-1200
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 04/09/2018
	Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (206) 553-1200
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 04/09/2018

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (206) 553-1200
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 04/09/2018
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (206) 553-1200
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 04/09/2018

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/22/2017	Source: Department of the Navy
Date Data Arrived at EDR: 06/13/2017	Telephone: 843-820-7326
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 02/09/2018
Number of Days to Update: 94	Next Scheduled EDR Contact: 05/28/2018
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/27/2017	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 74	Next Scheduled EDR Contact: 03/12/2018
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/27/2017	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 74	Next Scheduled EDR Contact: 03/12/2018

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
